

Integrated Solutions Division

Our Integrated Solutions Division caters for CEDIA members providing Intruder, Access control, CCTV and Fire systems for integration within products such as Crestron and AMX utilising RS232 and IP.

Combining new technology & bespoke equipment, we use our knowledge to reduce the aesthetic impact of our security systems.

Let us deal with this potentially difficult part of your portfolio while you concentrate on your core business.

We provide free surveys and design; once a working relationship is in place it is possible to provide free Fire Risk assessments as well.

Lee Security are currently in the process of gaining CEDIA membership in order to provide an even better service for our customers.

For more information please contact our Integrated Solutions Developer John Dupree on 0844 800 3411 or john@leesecurity.com
